

I'm sorry, but the local stations are nothing but infomercials and commercials with some traffic reports thrown in for good measure. And when there are special events such as baseball games...etc, traffic reports are non-available. There are many a people out here, like myself, who have to travel long distances to get to work and such. And with time being a critical issue, we are VERY dependent on having traffic reports available ON-DEMAND. Not when the local station feels like giving them to us.

The NAB's special interests do not do the public any good!! Look what they've done to satellite TV!! Why can't I purchase a local TV station broadcast from another city via my satellite provider? Because the special interest (not public interest) NAB killed it!!
